Subject: - Suggestions Received during Feedback Survey regarding updation/upgradation of Course Curriculum (Session 2023-24)
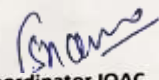

Sir,

As per the feedback collected from the teachers, students, and alumni, the following suggestions have been received by the IQAC

Suggestions

o   Satisfaction with the syllabus exists, but students call for a more practical approach using real-life examples and regular updates as per present industrial demands.
o   Requests for syllabus volume reduction and detailed teaching methods instead of rushed coverage.
o   A need for improved communication between teachers and students.
o   Recommendations for earlier result announcements and timely syllabus completion.
o   Requirement for job-oriented and skill-based teaching.
o   Diversification of course offerings and specializations.
o   Invitation to industry experts for guest lectures.
o   To foster collaboration and interdisciplinary projects.
o   Infrastructure facilities for technology advancement in the college should be increased.

It is for your kind information and further necessary action at your end please.

Coordinator IQAC

The Vice Chancellor

Himachal Pradesh University

Summer Hill- Shimla

Subject: Course Curriculum survey report conducted at Maharana Pratap Govt. Degree College Amb for your information and further necessary action.

Respected Sir/Madam,

We are pleased to inform you that our college conducted a course curriculum survey as per the guidelines of NAAC in the academic year 2023-24. 278 students and 29 faculty members of our college participated in this survey. The main points mentioned by faculty members and students that I would like to bring in to your kind attention for further necessary action are as under:
Suggestions:

a. Satisfaction with the syllabus exists, but students call for a more practical approach using real-life examples and regular updates as per present industrial demands.

b. Requests for syllabus volume reduction

c. Recommendations for earlier result announcements and timely syllabus completion.

d. Requirement for job-oriented and skill-based syllabus.

e. Diversification of course offerings and specializations.

f. Infrastructure facilities for technology advancement in the college should be increased.

Kindly do the needful and oblige.

Subject: - Suggestions Received during Feedback Survey regarding updation/upgradation of Course Curriculum (Session 2022-23)

Sir,

As per the feedback collected from the teachers, students, and Alumni, the following suggestions have been received by the IQAC

Suggestions

Arts

1. The curriculum designed for the undergraduate classes is not appropriate and not that effective as it does not serve the purpose of beginners, who start their journey in the subject from the very beginning

2. महाविद्यालय मे संगीत (वादन) के विद्यार्थियों ने इस विषय को +२ स्तर पर पढ़ा ही नहीं होता। इसलिए शिक्षक को बुनियादी ज्ञान यानि वादन तकनीकों से वादन की शिक्षा आरम्भ करनी पड़ती है।जबकि पाठ्यक्रम उच्चतर शिक्षा का होता है तथा क्रियात्मक पक्ष के लिए समय कम होता है। इसलिए क्रियात्मक पक्ष में आने वाली कठिनाईयों को ध्यान में रखकर पाठ्यक्रम तैयार करना चाहिए।

3. The Generic paper that is introduced in Masters should be related to the subject that is opted for by students in M.A.

4. We are lacking in a job-oriented curriculum, especially in the arts faculty. Job trends also be taken into consideration while framing the curriculum.

Sciences

1. Type study of at least one organism/animal in each phylum of non-chordates and each class of chordates is required in addition to general characters.

2. Practical course should be improved, there should be only single practical of 50 marks for both courses. More credit should be given for practicals in science subjects (only 20 marks are allotted at present),

3. The syllabus of BSC first year is very large as compared to other classes so it should be reduced

4. Fieldwork, visits to industries, and project works should be given due credit

5. Delays in the declaration of results create a lot of trouble for the students. Results should be declared timely.

6. There should be courses in C-language and coordinate geometry in the curriculum. Theory should be reduced and practicals should be enhanced in every curriculum.

7. B.Sc. (Physical Sciences with computer applications)

   a) Syllabus of Office Automation Tools (COMP 102TH) is not prepared in detail. It leads to confusion for the students and faculty members as only the general topics are mentioned there, which covers lots of other specific topics under the same topics. e.g., Unit-I contains only the Introduction to Open Office/MS Office/Libra Office. The specific topics like the one we frame for this section may help the students, faculty, paper setter, and evaluator to deal with the course curriculum.

   b) Introduction to Office Suites (A. Definition and Purpose B. Evolution of Office Suites C. Importance in Professional Settings)

   c) Overview of Common Features (A. Word Processing B. Spreadsheets C. Presentation Software

   d) Comparison of Office Suites
      i) Microsoft Office 1. Overview of MS Word, Excel, PowerPoint, and Outlook 2. Integration and Compatibility 3. Licensing and Costs
      ii) OpenOffice 1. Introduction to Writer, Calc, Impress, and Draw 2. Open Source Philosophy 3. Compatibility with MS Office Formats
      iii) LibreOffice 1. Writer, Calc, Impress, and Draw Features 2. Open Document Format (ODF) 3. Community and Development

   e) PHP Programming (COMP 203TH) is a completely practical subject it is difficult to understand the PHP concepts without practical. But only the theory paper is covered for this subject is covered in the syllabus and the Practical is missing.

   f) The implementation or practical part of Data Structure and File Processing (COMP 302TH) is in C++. The implementation part requires a strong understanding of this language but the student neither studied C++ Language in 3rd year nor in their previous years.

   g) Syllabus of Problem-Solving using Computer (COMP 101TH), PHP Programming, Operating Systems, and Software Engineering is a bit exhausted, it needs review by keeping in view the understanding level of Undergraduate Students.

   h) B.Sc. Physical Science with Computer Students undergo one Skill Course in Physics in 2nd year and one Skill Course in Mathematics in 3rd year along with one computer science course in both years. Whereas the other students Like Physics, Chemistry, Mathematics etc. undergo two skill courses from their parent department. It needs to be reviewed, and some courses like Image

Processing, Machine Learning, Web Designing etc. may be introduced as skill courses for 2nd or 3rd year students.

Commerce

1. New accounting software must be included
2. Syllabus should be prepared as per present industrial demand. Infrastructure facilities for technology advancement in the college should be increased. Further government should increase the post of teachers in computer applications so that the students can gain practical knowledge of software such as Word Excel and tally instead of bookish knowledge only.
3. In theory subjects some practical assignments such as case studies relating to subjects should be added and it should be compulsory for the students.

B.B.A, B.C.A. & P.G.D.C.A

1. New programming languages must be added to the syllabus
2. More practical subjects should be added to increase managerial skills among students
3. The syllabus should be updated according to the present advancement and technology

4. Modification in the syllabus is required. The syllabus should according to the present needs or requirements of the industry. Subjects like labour laws, digital marketing, and content creation should be introduced in BBA.
5. Update the syllabus of BCA. Add industrial training for students and make provision for industrial visits. The training programme should also be included in the course and the job training should be there. The syllabus should be according to the requirements of the industry. More subjects should be introduced like security analysis and portfolio management, New software which is used by the industries their use and working on them, and Special Arrangements for TPO in the Course. Updation and addition in the curriculum according to the needs of industry are very necessary and local needs must also be considered while framing the syllabi.

It is for your kind information and further necessary action at your end please.
